

A Quality Product does not always have to come at a Premium Price

With this in mind, we are happy to launch the new value for money range of Spralac products.

The Spralac range consists of two Clear Coats, a Surfacer, Plastic Primer, Thinner and a variety of Hardeners to suit. These outstanding products give your work a professional finish, ensuring a quality paint result.

- Spralac's **MS Top Clear Coat 2:1** is an easy to use non-yellowing high gloss clear coat with excellent UV protection, suitable for passenger cars. The mixing ratio with the MS Hardeners is 2:1.
- Spralac's **HS Primer Grey 3:1** is a good foundation for a high quality paint system, good adhesion, high film thickness and easy to sand. The mixing ratio with the 2K Hardeners SP2099/SP2009 is 3:1.

To achieve the best results, we advise you use Spralac products in accordance with the latest technical and material safety data sheets. These are readily available from www.spralac.com

Spralac Code	Description	Volume (L)
Hardeners		
SP2009	2K Hardener Fast	1
